Increment:

Working authentication system, full expense CRUD operations, group expense sharing, and dashboard reporting

Sprint Retrospective:

What went well:

- Comprehensive test coverage achieved for authentication and group management (unit and acceptance tests)
- Core authentication system implemented with multiple login methods
- Group functionality successfully integrated
- Basic dashboard expense reporting functionality successfully integrated

Area for improvement:

- Some UI fixes needed (misplaced button in landing page identified and fixed in Sprint 2)
- Configuration file restoration required (addressed in Sprint 2)
- Expense editing system fails when associated with group feature (addressed in Sprint 2)
- Teammates failed to deliver on time before Sprint 1 ends (addressed in Sprint 2, all features were perfected by the end of Sprint 2)
